Summary

I'm a full-stack web developer specializing in JavaScript, with professional experience, seeking full-time employment, either in the Southern California area, or remote.

Skills

- JavaScript: ES6+, node.js, Express, pug, mongodb+mongoose; task runners like Gulp, Grunt; build tools like Webpack
- HTML, CSS, DOM Manipulation
- Front-end JS frameworks like Backbone, React (some Redux); UI libraries like Bootstrap, and CSS tools like LESS and SASS
- Puppeteer/Chrome DevTools Protocol/Casper/PhantomJS/JSDOM for automation
- SEO techniques, responsive layouts, interest in accessibility
- Linux experience; PHP full-stack development experience

Recent Work Experience

Los Angeles Percussion Rentals
Santa Clarita, CA
Web Developer, Server Admin
2013 - Present

Complete rebuild of company's old static, tables-based website, including around 500 musical instruments and related images and assets. Goal was to create an intuitive, clean site that featured the client's photography, while eliminating duplication of data, and making it easy to edit and maintain.

The site has maintained close to 100% uptime, and is consistently high in search engine rankings.

Clicktripz
Manhattan Beach, CA (remote)
JavaScript Developer
April 2017 - April 2018

Worked on a fast-moving JavaScript integrations team in the travel ad-tech space. I helped install, fix, maintain, enhance, test, and deploy JavaScript code to customer websites. I worked closely with QA to ensure the quality and usability of our code, and helped increase test coverage of our codebase.

PhotoOne Media/onOne Software
Portland, Oregon
Web Developer/Consultant (remote)
July 2011 - January 2013

New e-commerce site and CRM/admin system for an online magazine. Set up new Linux server from scratch, moved existing components, and rewrote store front- and back-end using PHP and MySQL. Store had multiple product types, the ability to sell print and electronic subscriptions, and accepts credit card as well as PayPal payments. Admin allowed full editing of orders, users, products, promotions, subscription expiration dates, etc. Entire system interfaced with existing WordPress site.

onOne Software
Portland, Oregon
Web Developer/Consultant (remote)
January 2008 - December 2012

Company shopping carts (4 iterations, PHP back-end), database maintenance and optimization, custom database reports/queries, a video player with multi-select search system, CRM maintenance/additions, routine server maintenance, troubleshooting. Involved in quite a few different aspects of the organization, including marketing, customer service, accounting, and off-site shipping fulfillment.

References and additional work history available upon request. Fluent in English and Spanish.
